Summary

Passionate about software development, AI, and backend systems, with certifications from MEC Academy and Boot.dev. Built real-world projects like a Fire Detection System, Spam Detector Web App, Hologram AI Chatbot, and Task Manager App. Driven by innovation, I continuously explore new technologies to grow, collaborate, and solve meaningful problems.

Skills

Core Skills: Problem-solving, Analytical thinking, Team collaboration, API Design, Backend Arch
Technical Skills: Python, Java, JavaScript, SQL, HTML, CSS, Flask, FastAPI, Node.js, SpringBoot
Software Proficiency: Git & GitHub for version control, Docker, Postman, RESTful API, Linux

Certifications

AI Certified **Mar 2025-Sep 2025**
MEC Academy **Cairo, Egypt**

- Learned OOP.
- Built a foundation in Statistics for AI applications.
- Studied Machine Learning (Supervised & Unsupervised).
- Gained knowledge in Deep Learning techniques.
- Explored Computer Vision for image-based AI tasks.
- Worked with NLP.
- Practiced Model Deployment for real-world applications.

Backend Developer **Aug 2024-Feb 2025**
Boot.dev **Cairo, Egypt**

- Completed a comprehensive backend development training program using Java for scalable application design
- Gained hands-on experience with object-oriented programming, RESTful API development, and database integration (MySQL/PostgreSQL)
- Practiced version control workflows with Git/GitHub, including branching, merging, and team collaboration

Projects

SPAM Detector Web App
Fire Detection System (YOLO Model)
Task Manager API

Education

Preparatory School Certificate | Third Year

Kasr El-Dobara Language School

Languages

Arabic: Native

English: C1

Fluent (C1)

German: A2

Upper-Intermediate (A2)

Extracurricular activities

Mathematics Tutor | Resala Charity Organization 2025-Present
